

A graphic for the event 'Digital Health Ljubljana 2024'. It features a central globe with a white medical cross on it. Surrounding the globe are various icons representing digital health: a Wi-Fi symbol, a heart with a pulse line, a location pin, a smartphone, a document, and a person with a pulse line. The background is a dark blue gradient with a subtle grid pattern.

Genetic diagnostics of rare diseases

Around 8000 rare diseases are known, and their number is increasing (National Contact Point for Rare Diseases)

About 80% of rare diseases is caused by a pathological genetic variant

On average it takes more than 7 years before a correct diagnosis is made

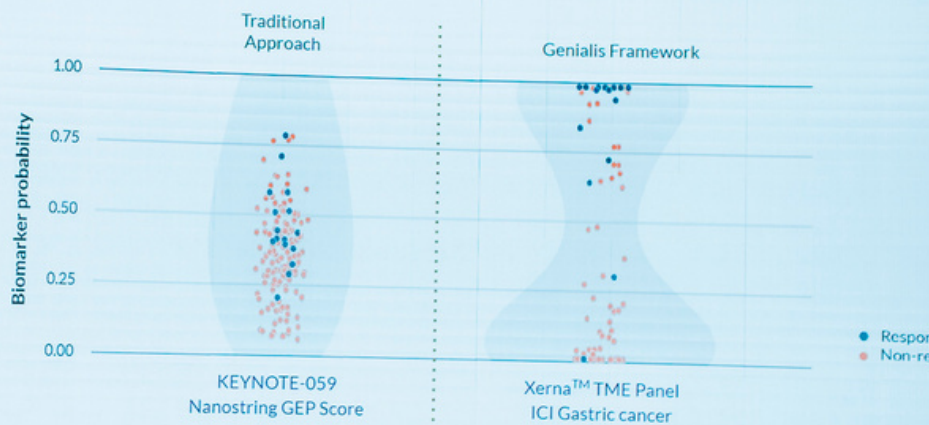

In Slovenia, up to 120.000 people (4-7% of population) live with one of the rare diseases
